

List of consultees

This is a list of individual and groups with which **safefood** will consult, as appropriate, as part of its s75 responsibilities. It is an indicative rather than exhaustive list, which will be reviewed on an annual basis to ensure it remains relevant to our functions and policies.

safefood will, from time to time, contact consultees in advance to establish if they are interested in receiving correspondence in relation to specific exercises to prevent the generation of unnecessary documentation and minimise waste. **safefood** will also from time to time ask consultees if they wish to be retained on the consultation list if they have not responded to consultation exercises in the previous two years.
